SEC illegally awards Booz Allen contract

Mr. Hoecker, Inspector General, SEC OIG:

The SEC just awarded Booz Allen Hamilton part of a \$2.5 billion 10-year IT contract.

As it was an IT (which includes cybersecurity) contract, the SEC Chief Information Officer (CIO) Chuck Riddle and the SEC Chief Information Security Officer (CISO) Andrew Krug were involved. Riddle and Krug are both former Booz employees and can look forward to going back to higher-paying Booz jobs.

Given Booz's dangerously IT incompetent performance -- just for example, high school dropout and traitor Edward Snowden was a Booz employee and Booz itself was hacked and lost tens of thousands of military emails to hackers -- Booz is clearly not qualified to fulfill this contract. It is thus almost certain that SEC's Riddle and Krug abetted Booz in getting the SEC contract in return for future Booz jobs.

Riddle and Krug are themselves IT incompetent and should also not have their SEC CIO and CISO jobs for that reason.

Furthermore, given that Booz is a publically traded company, it is supposed to be under the oversight of the SEC, but with Booz in such control of the SEC this oversight is fictitious.

I demand that this Booz-SEC contract be at least frozen and an investigation be performed re undue influence of Booz in getting the contract and Booz's ability to fulfill this contract.

A popular account of this is given at:

Booz Hacks Fed IT, Makes It Incompetent, Insecure, Bankrupt
